Ramaiah University of Applied Sciences , Bangalore

Btech in Information Science and Engineering
CGPA: 9.3 | (February 2026)
Expected Graduation: June 2027

Shree SwaminarayanGurukul ,Vapi , Gujarat

XII(CBSE) | 80% | (2023)

Shree SwaminarayanGurukul ,Vapi , Gujarat

X(CBSE) | 93% | (2021)

TECHNICAL SKILLS

Programming Languages: Python , Java , C , JavaScript

Technologies & Frameworks: HTML , CSS , React , TypeScript NumPy, Tailwind CSS , Node.js , Express.js

Database Systems: MySQL , MongoDB

Development Tools: VS code , MongoDB Compass , Vercel , Azure , AWS , Antigravity

Machine Learning: Numpy, FastAPI, Scikit-learn, Pandas, Matplotlib, Neural Networks , Deep Learning

DSA (Leetcode) : 300+ questions

PROFESSIONAL EXPERIENCE

Machine Learning Intern at Ctruh (Bangalore) (Onsite) (July-Aug 2025)

- Developed a multi-label skincare product recommendation system using supervised and unsupervised ML techniques.
- Collected and preprocessed skincare datasets for model training and evaluation.
- Built and fine-tuned predictive models(XGBoost , KNN) for personalized recommendations.
- Implemented a FastAPI backend and HTML and CSS interface for user input and result visualization.

Web Developer Intern at Innovate Intern (Aug-Sept 2024)

- Developed a responsive web-based application to manage vehicle services schedules and reminders.
- Built front-end components using HTML , CSS and JavaScript,enhancing user interaction and mobile responsiveness.
- Implemented backend logic for user account management,service history tracking and maintenance.

ACADEMIC PROJECTS

Multi-label Skincare Recommendation System (Github)

- Built a ML powered web application that recommends skincare products based on users's skin type ,complexion and concerns.
- Developed a multi-label classification model using XGBoost,Random Forest and Ensemble model .
- Created simple and responsive HTML/CSS frontend and implemented FastAPI backend to serve predictions with 89% accuracy.
- Performed data preprocessing , feature engineering and model evaluation to ensure 90 % accuracy.

Adaptive AI-Powered Othello Engine (GitHub)

- Built an AI-powered Othello game using Python and Pygame with real-time multiplayer (Socket.IO) and an in-game chatbot for move guidance.
- Implemented Minimax with Alpha-Beta pruning and a Logistic Regression-based move recommender for strategic gameplay.
- Designed adaptive difficulty using player profiling with modular architecture for scalable game logic and GUI.

AI Trip Planner (TripGenie) (GitHub)

- Built an AI-powered travel planning web application that generates personalized itineraries based on user preferences, budget, and trip duration
- Developed a React+TypeScript frontend and Node.js/Express backend with MongoDB for managing trip data.
- Integrated LLM APIs (Groq) to generate dynamic travel itineraries and recommendations.

CERTIFICATIONS

- Deep Learning for Developers with Infosys Springboard
- Full Stack Web Development Course with Apna College
- AWS Cloud Practitioner Essentials

ACHIEVEMENTS & EXTRACURRICULAR ACTIVITIES

- Runner Up at RUAS X Broadridge 9 hour Tech Hackathon(2025)
- Selected for QNX 24 hour Hackathon (2026) cluster round at Level, Bengaluru after college-level qualification
- Received Gujarat State Bravery Award(2015) & State Level Badminton Player (2018-2019) & State-Level Handwriting Competitor.
